## To Whomsoever it may Concern

The Indian Institute of Geomagnetism (IIG), Mumbai is operating a state-of-the-art Regional Centre named Shillong Geophysical Research Centre (SGRC) at the Wilton Hall Estate, Shillong. This centre is operating Multiparametric Geophysical Observatory (MPGO), established with a view to monitor the background seismicity of this region that has the potential to yield a great devastating earthquake in the coming years.

As an autonomous research institute under the Department of Science & Technology, IIG proposes to further expand its ongoing scientific studies in the vulnerable regions of North Eastern part of India. With this, we are happy to convey that we have installed a broadband seismograph (BBS) in the campus of St. Claret College, Ziro, Arunachal Pradesh in October 2019 for monitoring of seismic activities in the northeast region focusing on mitigate seismic hazard and hence risk.

For regular maintenance and data retrieval of BBS station, personnel from IIG SGRC regularly visit St. Claret College, Ziro. During these visits the employees of IIG also interact with the students and faculties of the college and deliver relevant scientific lectures and involve in scientific discussions.

**Subject: Request for permission to install Broadband Seismograph (BBS) in your premises.**

Dear Sir/Madam,

The Indian Institute of Geomagnetism (IIG), Mumbai is operating a state-of-the-art Regional Centre named Shillong Geophysical Research Centre (SGRC) at the Wilton Hall Estate, Shillong. This centre is operating Multiparametric Geophysical Observatory (MPGO), established with a view to monitor the background seismicity of this region that has the potential to yield a great devastating earthquake in the coming years.

As an autonomous research institute under the Department of Science & Technology, IIG proposes to further expand its ongoing scientific studies in the vulnerable regions of North Eastern part of India. With this, we are happy to convey that we have initiated multiparametric monitoring of seismic activities in the Northeast region focusing on identifying the precursors to mitigate seismic hazard and hence risk. We are in search of some suitable noise free and secure sites to install these instruments in the Northeast region.

Thus, with great hope, we have encouraged ourselves to approach you to provide your esteemed support to install Broadband seismograph (BBS) in your premises.

Kindly extend your help for the same.

With best regards

M. B. Nongkhlaw

**Sub: Permission to install Broadband Siesmograph (BBS) at SCCZ premises**

Dear Sir,

Greetings from Saint Claret College, Ziro (SCCZ).

With reference to your letter (Ref. No. 280/01 [adm] from Shillong Geophysical Research Centre), seeking permission to install Broadband Siesmograph (BBS) at our premises, I would like to inform you that **we are hereby granting permission for the same.** Please feel free to contact me for any requirements.

Yours truly,

  
27/8/19  
Dr. Fr. Allwyn Mendoz
