

SAINT CLARET COLLEGE, ZIRO ECO CLUB

Earth Day Celebration on 22 April 2021

Eco Club is a voluntary group that promotes awareness and activities in the conservation of the environment. Due to increasing environmental degradation, environmental education, training, and awareness plays important role in encouraging people's participation in activities aimed at conservation, protection, and management of resources essential for sustainable development. Eco club is one of the important activity clubs among other activity cells in the college, it was created by looking at the need of the hour of an environment-friendly generation because the present generation lives in an artificial world created by technologies. It is necessary to sensitize them towards nature.

The theme for this year's Earth Day is "Restore **Our Earth**" which focuses on natural processes and emerging green technologies that can restore the world's ecosystems. On the occasion of Earth Day on 22nd April 2021, the Eco Club in collaboration with the Department of Geography, Saint Claret College, Ziro had done a plantation drive wherein the members planted medicinal plants on the plantation site of the club at the College premise. A total number of 47 volunteers participated in the program. And to mark the occasion a member of the club delivered a talk in the morning assembly on the significance of Earth Day and its theme, followed by the release of a poster display highlighting restore our earth.
