3. Water Conservation Measures

Floor Plan (Water Distribution)

SAINT CLARET COLLEGE, ZIRO

7.1.2 Facilities and Initiatives (Geo-Tagged Photographs)

Construction of Tanks

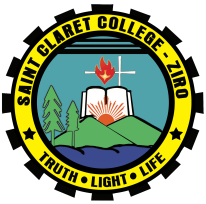

The College uses fresh spring water from nearby hills, collected, filtered, and preserved through water tanks construction on the campus. And elevation variables are made use of for natural flow (Supply) of water from one location to another.

Rain Water Harvesting

For the conservation of water and for its best alternative uses, the college have constructed an underground water tank for rain water harvesting, with the capacity of 2.5 lakh litres of water with an objective to meet the scarcity of water in the campus and for various alternative uses like, gardening, washing, etc.
